obtain audio clip
(e.g. record or retrieve pre-saved one)
Audio clip recorded?
Save new clip with an ID stamp
Obtain identifier associated with a remote receiving communication device, to which audio-clip is to be sent
Associate audio clip with the identifier as a tagged clip
Determine dialling criteria for transmitting audio clip
Seek a connection with the remote receiving communication device using the identifier and the dialling criteria
Upon establishing a connection with the remote communication device, opening the audio file and playing the audio file to the remote communication device.
